Press Release
Date: 7/18/07
Bella Mia, Inc.

Subject : Bella Mia, Inc. Expands HostDrive.Com data center facilities

We're expanding again! We've completely run out of room in our Lake Geneva Data Center. We have experienced enormous growth over the last 15 months, thanks in part to our dedicated server division. As such we have begun expanding the current data center in our phase 3 expansion project. Work is currently underway and expected to be completed in the coming weeks. In addition to adding space for another 75 internet servers, we have added another advanced HVAC unit to increase cooling and redundancy. We currently have an N+2 rating on cooling.

Space on the current expansion will not last long, so we have already started the phase 4 construction plan to add space for another 300 servers.

About Bella Mia, Inc.

Bella Mia is a privately held Web Hosting, Dedicated Server, Internet and Colocation provider located just North of Chicago in Lake Geneva, Wisconsin. We provide a wide range of services, including web hosting, dedicated servers, server colocation, domain registration, secure certificates, dialup, wireless and more. We have been providing internet services since 1997. Some of our current customers include, the FAO (Food and Agriculture Organization of the United Nations), The University of Florida, Akamai Technologies, Software Developers and several Major Web Host Resellers. Our NOC is connected via multiple DS3, GiGe, and Fiber connections from Time Warner Telcom, AT&T, ACC Business, and SBC Communications. Our 100% switched, Cisco Routed Network runs BGP4 (Border Gateway Protocol) for redundancy to insure that our network is running at 99.99% uptime. We have our own ASN and IP Space and as such are completely autonomous.
