Press Release  
Date: 12/14/10  
Bella Mia, Inc.

Subject : Bella Mia, Inc. Acquires McKremie Web Hosting

Bella Mia, Inc., the parent company of Hosting Lizard and HostDrive.Com, has acquired McKremie Web Hosting. McKremie Hosting customers will be placed in the Hosting Lizard brand of budget cPanel Hosting Services (<http://hostinglizard.com>) McKremie customers should contact [support@hostinglizard.com](mailto:support@hostinglizard.com) with any questions or problems. All customers web sites and databases have been migrated/moved to Hosting Lizard's cPanel servers.

If you are a McKremie Web Hosting customer, you should have been contacted by one of our representatives via email. Your current login and passwords for billing and your cPanel should continue to work as they have in the past. If you have any problems, again, please email us at [support@hostinglizard.com](mailto:support@hostinglizard.com) or call us at 1-888-576-5594.

If you are having problems viewing your site, please contact our Billing Dept immediately at 1-888-576-5594.

#### About McKremie Web Hosting

McKremie, LLC is a US-based web hosting provider of shared web hosting solutions for small to medium-sized businesses and individuals looking for an affordable web hosting option. Privately owned with offices in Henderson, Nevada and Beaumont, California, the company was founded in 2006.

#### About Bella Mia, Inc.

Bella Mia is a privately held Web Hosting, Dedicated Server, Internet and Colocation provider located just North of Chicago in Lake Geneva, Wisconsin. We provide a wide range of services, including shared and reseller hosting, dedicated servers, server colocation, domain registration, secure certificates, dialup, and more. We have been providing internet services since 1997. Some of our current customers include, the FAO (Food and Agriculture Organization of the United Nations), The University of Florida, Akamai Technologies, Software Developers and several Major Web Host Resellers. Our NOC is connected via multiple Fiber connections from Time Warner Telcom COGNET Communications. Our 100% switched, Cisco Routed Network runs BGP4 (Border Gateway Protocol) for redundancy to insure that our network is running at 99.99% uptime. We have our own ASN and IP Space and as such are completely autonomous.
